

Udacity Project Listing

Web application development support needed for ABC Enterprises .

Posted : 3 hour

Hourly : 40 \$ - 70 \$ Based on experince.

Project time : 4 Months , 20 Hour per Week.

Project Description :

ABC Enterprises is looking to develop a web application to manage their inventory. The application should allow users to add, edit, and delete items from the inventory, as well as view the current inventory levels. The application should also generate reports on inventory usage and be able to alert users when inventory levels are low. The application should be developed using Java, Spring Boot, and MySQL, and should be deployed on AWS.

Requirements:

- Strong experience in Java, Spring Boot, and MySQL
- Experience in developing web applications
- Knowledge of AWS deployment
- Strong communication skills and ability to work in a team
